Summary

Full Stack Developer with 2+ years of experience building scalable applications using **MERN stack**, **GraphQL**, and **cloud services**. Delivered high-impact projects like **semantic search with OpenAI embeddings and Elasticsearch**, and **optimized booking and e-commerce systems across 100+ stores**. Passionate about **AI**, **clean architecture**, and **shipping fast, reliable solutions**.

Technical Skills

Languages: Java | Python | C/C++ | SQL | JavaScript | HTML/CSS
Frameworks: React | Node.js | Express | GraphQL | WordPress | Material-UI | RestAPI
Technologies: Git | MongoDB | Jenkins | AWS (DynamoDB | S3 | EC2 | Lambda) | Selenium | RabbitMQ | Google Cloud Platform | VS Code | Visual Studio | ES6+
Certifications: Data Structures and Algorithms | Web Development
Soft Skills: Effective Communication | Team Collaboration | Problem Solving | Adaptability | Leadership

Education

JSS Academy of Technical Education, Noida, UP CGPA : 7.55
Bachelor of Technology, Computer Science and Engineering

Experience

Software Engineer - Backend Developer *November 2023 – Present*
Heads Up For Tails, Gurugram, Haryana

- Led the **Shopify Order Integration Project** for personalized pet products using **Node.js**, **MongoDB**, **RabbitMQ**, **Google Sheets API**, and **Shopify Admin API**; reduced manual order processing by **80%** and improved cross-team collaboration.
- Built a **Distance Calculation API** that leveraged user geolocation to suggest nearby retail stores, enhancing store visibility and contributing to a **10% increase in in-store sale** within 3 months.
- Developed secure and scalable **GraphQL APIs** using **Shopify Admin API** and **MongoDB** to manage gift card functionalities—including balance, expiry, and redemption—resulting in a **25% increase** in gift card usage and enhanced customer satisfaction.
- Designed and developed an **Appointment Booking Admin Panel** for in-store bookings using **Next.js**, **Node.js**, **Express**, and **MongoDB**, handling **1000–1500 appointments daily**. Enabled seamless online scheduling, resulting in a **70% increase in total bookings** over 100+ retail stores.
- Engineered a **Semantic Search Pipeline** leveraging **Elasticsearch** and **OpenAI Embeddings**, transforming keyword-based queries into contextual results and improving search accuracy and product discoverability across the platform.
- Refactored and optimized complex **MongoDB** queries and schemas, resulting in a **30% reduction** in average API response times and improved backend scalability.

Software Engineer-Trainee *Apr. 2023 – July 2023*
Round the Clock Technologies Private Ltd, Noida, UP

- Automated end-to-end test flows for multiple client websites using **Java** and **Selenium WebDriver**, leveraging advanced locators and dynamic **XPath** expressions to ensure **100% test coverage** and high element interaction accuracy.
- Integrated automated test suites into **CI/CD pipelines** with **Jenkins**, reducing regression testing time by **60%** and accelerating feedback on code changes for faster deployments.

Projects

HUFT App – Pet E-commerce Platform *Node.js, Express.js, MongoDB, Flutter, AWS*
Nov 2023 – Present

- Contributed at a scalable e-commerce backend for a pet care brand, supporting personalized product recommendations and pet service bookings.
- Implemented data-driven APIs using **MongoDB** and **Express.js**, reducing query latency by 30% and improving response consistency.
- Delivered a seamless cross-platform mobile experience using **Flutter**, increasing monthly active users by 25%.

Coin Pulse – Crypto Tracker App *React.js, JavaScript, Material UI, Chart.js*
June 2023 – Aug. 2023

- Created a responsive crypto dashboard app to visualize real-time data using **Chart.js** and the **CoinGecko API**.
- Managed global state with **React Context API**, streamlining UI updates across dynamic components.
- Enhanced UI with **Material UI** components for modern design and faster user interactions.

Genify – AI Content Assistant *Next.js, React, Clerk, Google Gemini AI, Tailwind CSS*
June 2025 – Present

- Developed an AI-powered content generator enabling users to create SEO-friendly blogs, tweets, and code using **Google Gemini AI**.
- Built a modern and responsive UI with **Tailwind CSS** and integrated rich text editing via **Toast UI Editor**.
- Implemented secure user authentication and session management using **Clerk**.
